Dust Bag Housing for Protection and Performance

Because maintenance of your dust bag is critical to the safe operation of your briner, we offer a custom housing to protect your dust bag from rain, ultraviolet degradation, and the rigors associated with outdoor exposure. This robust HDPE housing occupies a 4' Ø footprint and stands 9'6" tall. All components are resistant to salt and brine exposure. To optimize the performance of your briner, utilize the *Dust Bag Housing* from BrineMaker.
